

 **ROBINSON**

**PIPE & VESSEL**

A DIVISION OF ROBINSON METAL, INC.

# EXPERT CRAFTSMAN. WORLD-CLASS PERFORMANCE.

At Robinson Pipe & Vessel, you'll experience true collaboration, expert fabrication, and a process that's as streamlined as it is thorough.

The expertise of our engineers, project managers and production team members differentiates us from other manufacturers. Our customers appreciate that they can communicate directly with the people making their products, from concept through factory acceptance testing. Our team of specialists work collaboratively with your process engineers, so you can have the peace of mind that your project is done right the first time.

Robinson Pipe & Vessel is a dedicated unit of Robinson Metal Inc., a recognized industry leader and the Midwest's single-source solution for custom metal work. At Robinson, we unite expertise with experience, tools with technology, and certifications with dedication. Our advanced, 185,000-square-foot facility in De Pere and our 112,000-square-foot facility in Manitowoc, complements our craftsmanship, and allows Robinson Pipe & Vessel to offer a more complete solution for your pipe and vessel needs.

- Customers throughout US, Canada and Europe
- RPV holds U, S and R Stamps
- B31.1 and B31.3 manufacturing capabilities
- API-1104 qualified
- DNV, PED and CRN needs can be met upon request
- In-house machining, assembly and hydro-static testing capabilities up to 30K PSI
- ASME/AWS qualified welding staff managed by our in-house CWI/ASNT Level II Inspectors
- ISO 9001:2015 Certified
- RPV Governed by ASME quality manual
- Health and safety stats provided upon request

## DESIGN

Our design team has extensive experience in designing a wide range of pressure vessels, piping spools, skid base equipment, and complex fabrications.

## QUALITY CONTROL

Our ASME quality program is also backed by our ISO 9001 certification.

## PROJECT MANAGEMENT

You will have a personal relationship with a project manager who is dedicated to understanding the vital details of your project.

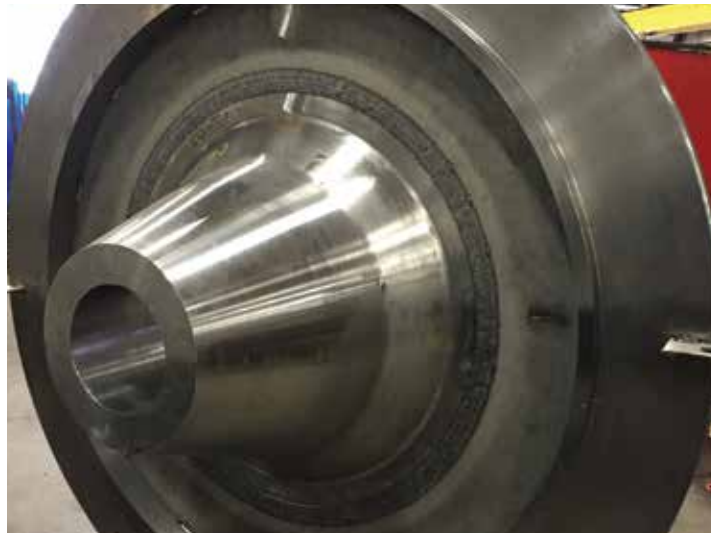

## ENGINEERING

Our team has the unique ability to take your project from concept to completion including production and factory acceptance testing — entirely in-house.

With the commitment to our ISO and ASME quality programs, Robinson Pipe & Vessel delivers a wide range of inspections to meet your specific project requirements. We verify tolerances are met as well as in-process inspections to keep your project on track.
